AGILEBLUE

Tabletop Exercise (TTX)

A facilitated, scenario-based exercise that puts your team through a realistic cyber incident, exposing gaps in communication, roles, and response before a real attack does. Led by AgileBlue practitioners using real world threat intelligence.

ENGAGEMENT AT A GLANCE

- Remote, 2–3 hour scenario
- Kick-off call included
- IT team and/or executive team
- Written recommendations

Is Your Organization Truly Prepared?

Most firms hand you a report and disappear. AgileBlue turns findings into action, integrated into your roadmap, remediation tracking, and tabletop exercises.

01 Most organizations think they're prepared, but they haven't tested it.

Having an Incident Response Plan and executing it under pressure are two different things. Untested teams lack coordination and clear roles.

02 A TTX reveals gaps before real problems happen

A tailored playthrough with your decision makers surfaces communication breakdowns, outdated procedures, and role confusion on who responds to what, where and when.

03 The TTX strengthens your Incident Response Plan

Expect updated policies, sharper processes, clearer role assignment, and a better communication plan, plus documented evidence of resilience for leadership.

AgileBlue Tabletops: What You Walk Away With

Scenario Debrief Report

What happened, how your team responded, key decision points, strengths and gaps.

Gaps & Risks Assessment

Prioritized vulnerabilities across people, process, and technology.

Actionable Recommendations

Concrete next steps with owners and timelines.

IRP Review & Feedback

Standard and Premium: feedback on gaps, outdated procedures, improvements.

Premium Exclusive

Deep Fake & AITM Demonstrations

A **Deep Fake Imposter** demonstration uses AI-generated synthetic media (audio, video, or images) to convincingly impersonate a privileged user.

An **Adversary-in-the-Middle** demo simulates a threat actor positioned between a user and a legitimate service, run in a controlled client environment.

Choose Your Engagement Level

Basic — $7,000

IT Team Scenario

- Choose from 4 standard scenarios: Insider Threat, BEC, Ransomware, or Disaster Recovery
- Kick-off call included
- Remote TTX scenario, up to 2 hours
- Actionable recommendations report

Standard — $12,000

Customized IT Team Scenario

- Tailored, customized IT Team TTX scenario
- AgileBlue reviews your current IRP and provides recommendations and feedback
- Kick-off call + remote TTX up to 3 hours
- Follow-up call to discuss treatment options

Premium — $22,000

IT Team + Executive Scenario

- Tailored IT team and/or executive team scenario
- AgileBlue SOC team interaction with a live Case
- Deep Fake Imposter or BEC Adversary-in-the-Middle (AITM) scenario option
- IRP review, kick-off call + 3-hour remote TTX, recommendations report

The best time to practice is before a crisis, **not during one.**
